

Downloading to a Kindle

With a 3G Connection

E-books are now available for download to the Kindle. They can be read on any generation Kindle device, free Kindle app, or in your browser with Kindle Cloud Reader.

How to check out a book for your Kindle:

1. Using your **desktop computer or laptop**, visit NorthBabylonPL.org, and click on the "Free Downloads" link at the top of the page.
2. You can do a simple search with the title, author, or keyword, or you may choose to perform an advanced search.
3. Once you have found a title you are interested in, make sure there is an icon of a book in the upper right corner (headphones means it is an audiobook). Click on the book cover and make sure that "**Kindle Book**" is listed under "Available Formats."
4. On the screen you will see how many copies of the book are available at the moment. If available, click "Borrow." If the book is unavailable, you can add your name to the wait list and be emailed when it becomes available by clicking "Place a Hold."
5. When checking out, you will be asked for your home Library and barcode number.
6. You will be brought back to the screen with the "Borrow" button. Click this button again to access your download. Next, click the "Go to Bookshelf" button. You can read the book in the browser by clicking "Read" (if the option is available) or transfer it to the Kindle by selecting "Get for Kindle," then "Confirm." You will be brought to Amazon.com.
7. If you are not already logged into your Amazon account, you will be asked to log in. *Be sure to use the same account information you used to register your Kindle.*
8. At this point you will need to attach your kindle to the computer using the USB cable. **Do not** close the screen that pops up showing the content on your Kindle. (On some computers the box showing the content on the Kindle may appear at the very bottom of the screen as an object that was minimized.)
9. On the screen you will see a "Get Library Book" button. Select Deliver to "**Transfer via Computer**" from the dropdown menu and click the "Get Library Book" button. A screen saying "Please choose which Kindle you plan to transfer your title to via USB" will then appear. You will be asked if you want to open or save the file. Choose "Save." (The message to save may appear at the very bottom of the screen, depending on the computer.)
10. At this point you may open the box that had popped up when the Kindle was plugged in (see step 8). In this screen, click the link that says "Open folder to view files," then open the "documents" folder. Click and drag the title from the downloads box where it appears and drop the title into the box that was just opened. Wait for the transfer to complete. *If you do not see the title in the documents box, you may sort by "date modified," creating a list of items in order of the date they were created.*
11. Eject the kindle from the computer and turn it on to view the library book!
